Webtweaktools	**Fast Link Checker Press Kit: Product information**
ABOUT FAST LINK CHECKER	A tool used for searching sites for broken links. It begins checking from the starting page and goes through all pages one by one until it checks all links on the site. If Fast Link Checker finds a broken link, it shows its position in the document and the cause why it does not work. Fast Link Checker can check links in files available via the HTTP, HTTPS, FTP, FTPS and RTSP protocols on sites hosted by any properly configured web server.
FAST LINK CHECKER LITE	A free and easy to use utility that checks a site for broken links. It starts checking links from the specified URL and processes all found pages on the site until all links are checked. Fast Link Checker Lite can check links to different resource types on both current and external sites, check all static and dynamic HTTP and HTTPS pages, FTP, FTPS and RTSP links.
SYSTEM REQUIREMENTS	Fast Link Checker will run under Microsoft Windows 2000 / XP / Server 2003 / Server 2008 / Vista / 7 / Server 2012 / 8 Desktop 32 or 64-bit operating system. It requires about 30 megabytes of disk space.
LANGUAGES SUPPORTED	English, Portuguese, Russian.
LOGOS AND GRAPHICS	Fast Link Checker logos and graphics, including icons, emblems, screenshots in low and high resolution are available here: http://www.fastlinkchecker.com/presskit/. All logos and graphics can be downloaded in one file: http://www.fastlinkchecker.com/presskit/fastlinkchecker-presskit.zip.
